Public Cloud

Public Cloud provides you with an extensive range of services with the flexibility needed to build and run your applications. Get started easily and take advantage of on-demand resources to scale up from small projects to large enterprise deployments.

OVHcloud ensures simplicity so that you gain the freedom to innovate. You benefit from the expertise of a leading global hyperscale provider that's completely focussed on infrastructure and cloud services. Scale is in our DNA, integrating the value chain with our own datacentres globally, we've developed high performance instances and high capacity networks for smooth data transfer. Services are billed on a pay-as-you-go basis and by default, our Guaranteed Resources instances are set up in a simple way to accelerate innovation for your business.

Why OVHcloud Public Cloud?

- ▶ Simple services make it easy to deploy and manage projects for you to know exactly what the costs and results are.
- ▶ Transparent pricing is predictable, all inclusive with no surprises, and you ensure data protection.
- ▶ Outstanding performance to price ratio, maximum IOPS and flexible compute intensive use cases.
- ▶ Open source software by design enables API integration and protection from vendor lock-in.
- ▶ Data transfer is included for incoming and outgoing traffic, backed by a high capacity global network.

Innovative solutions ready for your use cases

Cloud migration and multi-cloud strategy

Cost optimised and sovereign storage

Digital Factory: DevOps CI/CD

AI and data-driven applications

A trusted, open and integrated cloud ecosystem

OVHcloud puts freedom in your hands. With our open source orchestrators, you're free to use preferred tools to manage your infrastructure, integrate with other solutions via API, and simplify technology for faster time to market. With no additional work required, native compatibility between systems enables a range of advantages such as multi-cloud strategy, resilience, automation and data transfer that's as efficient as possible.

Our Public Cloud is built using industry-standard technology and is one of the largest OpenStack deployments in the world, validated by the **OpenStack Foundation**.

Our Managed Kubernetes service enables you to orchestrate your containerised applications with a cluster certified by the **Cloud Native Computing Foundation**.

OVHcloud at a glance

1.5 Million Customers Worldwide

30 Datacentres Across 4 Continents

20 Tbps Bandwidth Capacity

20 years as a Cloud Pure Player

34 PoPs (Points of Presence)
